

ASHUTOSH

Results-driven Python Developer with expertise in Django, Flask, and AI/ML libraries, backed by enterprise-level cybersecurity certifications (Microsoft SC-100 by Cybary, ISEA). Designs secure, scalable applications and deploys ML solutions spanning computer vision and predictive analytics. Delivers clean, performance-conscious, security-aware code following industry best practices.

EDUCATION

Bahra university

Bachelor of Computer Applications (BCA)—Specialization in Artificial Intelligence

- Bahra University, Solan, Himachal Pradesh | Coursework: DSA, Software Engineering, Database Systems, Network Security, AI

PROJECT

Password Hash Cracker

- ☒ Engineered a parallel hash-cracking tool supporting MD5, SHA-1, and SHA-256 via Python multiprocessing, achieving ~70% reduction in crack time.
- ☒ Implemented dictionary and brute-force attack modes with robust input validation and secure testing controls.

Sign Language Recognition System

- ☒ Built a real-time CNN-based ASL gesture recognition system achieving 90%+ accuracy across all 26 alphabetic hand signs.
- ☒ Integrated OpenCV for live webcam capture and constructed a custom labelled dataset pipeline in TensorFlow for end-to-end model training.

Breast Cancer Detection—AI Classifier

- ☒ Benchmarked SVM, Random Forest, and Logistic Regression on the Wisconsin Breast Cancer Dataset, attaining 96%+ classification accuracy.
- ☒ Applied feature engineering, stratified cross-validation, and hyperparameter tuning; validated with confusion matrix and ROC curve analysis.

SKILLS

- Languages Python, Java, PHP, C++, C
- Frameworks Django, Flask, NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow, OpenCV, Requests
- AI / ML CNN, Supervised Learning, Computer Vision, Feature Engineering, Model Evaluation, Hyperparameter Tuning
- Security Secure Coding, Threat Modeling, Network Security, Vulnerability Analysis, Cyber Hygiene
- Tools & DBs Git, GitHub, Linux, Jupyter Notebook, VS Code, MySQL, SQLite, REST API Development
